ABOUT US

Suntree Woods Pvt. Ltd. a company headquartered at Ernakulam, Kerala, incorporated in the year 2022 is into the business of dealing in a wide range of building materials. The company is part of a family enterprise that has existing businesses in Flexible packaging, Colour coated steel etc.

The company under the brand name 'Suntree' has ambitious phase wise plans to distribute its products throughout Kerala, eventually expanding to South India and ultimately to become a pan India brand.

Suntree has invested extensively in product development, process automation etc. and is adopting a digital-first approach across all relevant facets of its business with the objective of giving its customers a pathbreaking and gratifying experience thus paving the way to building overall confidence in the brand.

OUR VISION

Win over customers by being a responsible/reliable and sought after brand in plywood and related products, commanding market leadership position in the Indian market by 2035.

SUNTREE BRAND POSITIONING

We help our customers who are facing problems in getting proper after-sales service and prompt product availability to experience confidence and support unlike other brands in the market. Our offerings will have a professional touch and will be reliable.

VALUES BASED BRANDING

From the word go Suntree as an organisation has realized the significance of establishing and imbibing Corporate Values, that are to play a crucial role in building the brand. The very fact that our values are customer, environment, systems and people oriented, that invariably harmonize with each other, consequently serving as a guide for all major corporate decisions, is what sets apart the brand from other competitors and providing the brand its distinct identity.

We believe positive values help bolster the brand in the minds of our valued customers and other stake holders thus building their confidence, setting the foundation for improving brand loyalty in turn enhancing profitable and consistent growth in business.

SUSTAINABILITY

Sustainability as a corporate responsibility embraces multifaceted dimensions at Suntree. By nature of the business that uses natural resources, stringent sustainable practices are adopted at several levels from raw material sourcing, product manufacturing, inventory management and distribution as long-term continuity of the business is dependent on it. Sustainability also entails performing waste management, energy efficiency, carbon footprint reduction, manpower resource management, appropriate technology deployment and similar processes extensively. We strongly believe sustainability as a value is paramount in maintaining positive relationships with trustworthy customers, investors, vendors, employees, communities, as well as other stake holders and in meeting regulatory compliances. Sustainability coupled with innovation enhances profitability in operations which is critical in retaining a competitive edge and in meeting market demand. Sustainability promotes business confidence and augments brand loyalty.

ECO FRIENDLY

The nature of the business mandates that we follow intense eco-friendly measures that make us a responsible corporate. Interestingly, though timber is a major raw material in manufacturing plywood being an engineered wood, by its very nature plywood helps reduce deforestation. In addition to a host of in-house eco-friendly practices implemented to reduce carbon footprint, Suntree proactively takes several concrete steps to enhance afforestation with the objective of preserving our precious biodiversity.

RELIABILITY

At Suntree reliability is embedded across all functions and processes. We believe it is the trust that reliability would garner that would help establish the brand and build its reputation. Reliability is delivered through consistent quality in our products, processes, systems and services and fostered as a culture among our employees thus boosting their morale. We strive to consistently deliver our promises to our valued customers and other stake holders thus increasing lifetime customer value which obviously is the key to customer retention. Reliability undoubtedly is key to building confidence

CUSTOMER ORIENTATION

We believe our customers are our lifeline. 'Care giving' being a building block of the brand, customer satisfaction takes precedence in all our actions and in decision making. Suntree has and continues to standardise its processes and invest abundant resources by way of product development, technology, human capital, data analysis, conducting awareness programs etc. to be professional and remain customer oriented throughout its legacy. Satisfied customers throughout the supply chain are key, in building confidence in the brand, ushering in brand loyalty and in expanding our business profitably

TECHNOLOGY FIRST

At Suntree technology takes precedence and is deployed across all relevant operational streams that include product quality, commercial transactions, sales admin. automation and most importantly customer relationship management. We believe adopting state-of-the-art technology prudently, helps improve efficiency, scalability, and access to crucial real-time data that primarily helps us to optimize cost, capture and analyse customer behavior in order to improve our deliverables thus creating a competitive edge over our competitors. Suntree has thus made significant investments in adopting the best-in-class technology with the intention of enhancing overall confidence.

PEOPLE FRIENDLY

Notwithstanding the advancements in technology, systems, AI etc. deployed at Suntree, the involvement, contributions and interactions of people at all walks take center stage.

Knowledge enhancement is enshrined in the brand's framework. Suntree believes in being fair, ethical, and transparent in human resource policy development, communication and in their execution providing an employee friendly atmosphere that fosters their advancement and well-being. The mantra 'satisfied employees create satisfied customers' is well entrenched within the organisation which in turn nurtures the brand's reputation, enhancing brand loyalty and building overall confidence of all stake holders within the eco system.

PRODUCTS SPECS

Suntree Solid MR Grade Plywood is moisture resistant interior grade plywood made from high quality hardwood veneers and is bonded with superior grade Melamine Urea Formaldehyde (MUF) resin. This makes our plywood strong enough to resist warm water up to 8 hours and can be used in hot and humid climatic conditions. This grade of plywood is mainly used for paneling, interior partitions and furnishing. This category plywood comes with 5 Years Warranty.

Borer & Termite
Resistant

Suntree Solid BWR grade plywood is a preservative-treated, water resistant plywood, manufactured from select hardwood timber as per IS: 303 – 1989 specifications. It is made from selected hardwood veneers and is bonded with extended superior quality Phenol Formaldehyde (PF) Synthetic resin with and Pre-Press Technology. The superior bonding strength of the BWR-type Synthetic resin adds extra durability making it highly water resistant. The result is a high quality ply that can resist boiling water, cold water and climatic variations. It is also chemically impregnated for better resistance and to impart termite and borer resistant properties. These grades of plywood are widely used for Wall paneling, Furniture, Hoardings and Semi Exterior works. Suntree Solid BWR comes with 8 Years Warranty.

CLASSIC 710

Suntree Classic BWP Grade Marine Plywood is made from 50% Eucalyptus and 50% Premium High Density core veneer. This BWP plywood is bonded with undiluted Phenol Formaldehyde (PF) resins which are processed through high temperature and pressure to keep the bonding intact even after 72 hours of boiling. All veneers are treated with preservatives and an additional treatment on the glue line is performed with highly durable preservatives. The core veneers of this BWP quality plywood are given chemical treatment in a Vacuum Pressure Impregnation (VPT) process. The result is a Boiling Waterproof Plywood that is highly resistant to attacks from all types of micro organisms and extremely severe weather conditions. This BWP plywood comes with IS:710-2010 and also with 20 Years Warranty.

IMPERIAL 710

Suntree Imperial BWP Grade Plywood is made from the combination of 50% Gurjan and 50% Eucalyptus wood and bonded with Phenol Formaldehyde BWP grade resin under high temperature and pressure. Manufactured with the revolutionary GLP technology, it is 100% borer proof and termite resistant. The core veneers of this BWP quality plywood is given chemical treatment in a Vacuum Pressure Impregnation (VPT) to ensure protection against wood destroying organism. It can withstand climatic variations & extreme weather changes that make it ideal for applications in external balconies, terraces, office areas, kitchens, bathrooms, and toilets, i.e., areas exposed to stress, moisture & dust. The product is also fit for usage in partitions, paneling, cavity flooring, kitchens & all other types of furniture, panel doors, cabins, false ceilings, etc. This Marine Plywood comes with IS:710-2010 and also with 35 years Warranty.

SIGNATURE 710

Suntree Signature Grade Plywood made primarily from 80% Gurjan and 20% Eucalyptus wood, faced with Gurjan veneers, and high-compression and bonded with unextended PF resin. Suntree Signature Plywood is versatile and environment-friendly. The durability & stunning appearance of Gurjan timber makes it an excellent option for furniture. All veneers are uni layered and have thicker face veneer for longevity. Pure Phenolic Resin are used to make the bond strong. This plywood ensures optimum adhesive strength apart from GLP (Glue Line Poisoning) which makes it Borer and Termite proof. Suntree Signature comes with Life Time Warranty.

GURJANO 710

Suntree Gurjano BWP Grade Plywood is a premium product from the house of Suntree Plywoods. It is made of 100% Gurjan wood and bonded with an unextended Phenol Formaldehyde resin of BWP grade. Each of its veneer layers is treated with preservatives and is glue-line protected to ensure complete protection from insects. This plywood is also boiling water proof. Besides having a higher face thickness, all veneer layers have a uniform thickness construction. Gurjan is a unique and high density timber with natural bonding tendency and is termite and borer proof. It is reputed as a key timber species in making strong plywood. High density in woods leads to increased load bearing capacity. Hence the core and face veneers of the Gurjan wood increases the durability of the products. It has been fully treated with preservatives using organic chemicals. Gurjano is 100% borer & termite proof, fungus-free and heavier, with Lifetime Warranty offering the best quality plywood.
